**SKYLER TECHNOLOGY, INC. APPOINTS FINANCIAL SERVICES VETERAN AS VICE PRESIDENT OF SALES AND CUSTOMER SUPPORT**

***Industry veteran brings strong track record for leading high-growth sales organizations***

NEW YORK – Skyler Technology, Inc., an innovator in providing in-memory databases for real-time processing of market data for the financial services industry, is pleased to announce the addition of industry veteran, Richard Chmiel to Skyler’s management team. Chmiel brings over twenty-five years of experience in the financial services industry to Skyler as a Vice President of Sales and Customer Support. Chmiel will be responsible for all of Skyler’s sales and customer support activities worldwide.

“Richard’s familiarity with the decision makers on Wall Street will allow Skyler to quickly grow its sales organization and capitalize on the traction the C3™ Database is receiving,” says Michael Lenahan Skyler’s President and COO. “He is a great match for the company, as his skill-set complements the current management team and his energy for success is contagious.”

“I am excited to join such a knowledgeable and professional management team as Skyler’s and I look forward to contributing to the success of C3, the industry leading in-memory real-time database solution” said Chmiel.

Mr. Chmiel joins Skyler from LatentZero where he was responsible for business development and sales for the New York region covering large asset managers and hedge funds. Prior to LatentZero, Chmiel held global sales and product management positions with SunGard Trading Systems overseeing new product introductions resulting in considerable financial success. Previous to that, Chmiel held various management positions at BrokerTec and Bloomberg where he played key roles resulting in dramatic growth and success.

Skyler C3 Database is a real-time in-memory database tailored to the needs of the capital markets. The system combines a real-time cache, a stream processing engine, and a time series database in one fast, flexible, and easy-to-use product. The C3 system can be applied to power real-time applications including: order book servers, algorithmic trading engines, smart order routing applications, ticker plant systems, and much more.

Skyler Technology, Inc. is a privately held company located in Walnut Creek, California.
